### **Rack solutions for every requirement**

A well-chosen rack or cabinet will not only look good, but will add security, increase the lifespan of your devices and also make it easier to maintain the equipment inside, so saving you money and time.

The Datwyler IT racks are as varied as the requirements of our customers. The range includes Standard and Premium racks as well as wall-mounted racks of various sizes, dimensions and configurations. The racks can be adapted to the intended configuration, the relevant cooling concepts, the cabling and/or your safety requirements.

Our wide range of rack accessories includes fans, lighting, earthing and equipotential bonding sets, PDUs, cable management kits, shelves, faceplates and individual doors to coordinate with the cabinets, as well as a lot more besides.

Туре	Serve	r Rack	Network Rack		Network Rack	Wall Mount Rack

# **MICRO AND MINI DATA CENTRES**

# Cutting edge solutions for small and decentralised data centres

Our world is becoming increasingly digital, interlinked and intelligent. IoT, automation, 5G, robotics and artificial intelligence are opening up many new applications and business models.

To capitalise the opportunities which come with digitalisation, your organisation must rely on a smart and strategic IT infrastructure.

The amount of data produced will continue to grow exponentially. These data volumes have to be processed close to their source (Edge Computing) due to, among other factors, efficiency and latency times. A lot of mini and micro data centres are needed to do this.

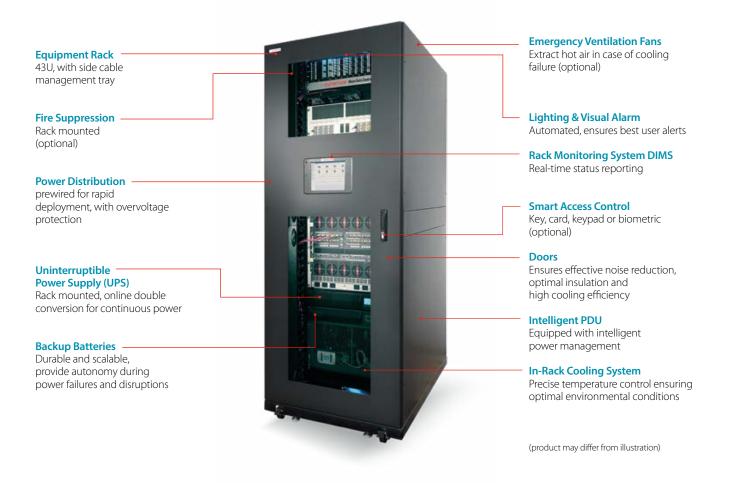

Datwyler is a global player that helps organizations to stay at the forefront of progress, elevating their core business. While you focus on developing your business, we take care of your data centre infrastructure – with a comprehensive of customised product solutions and one-stop service solutions tailored to your needs.

### **DATWYLER MICRO DATA CENTRE**

Datwyler Micro Data Centre is a compact, preassembled, plug-and-play, quick to deploy, fully monitored and managed, low maintenance onsite IT infrastructure solution. It is a standalone data centre that integrates the elements of cooling, power supply, monitoring and security into a single solution.

Unlike maintaining onsite data centres and server rooms which need extensive maintenance, planning, cost and space, the Datwyler Micro Data Centre is a compact solution that enables businesses to run applications on-premise or at the "Edge". The infrastructure can be customised according to customer needs and requirements.

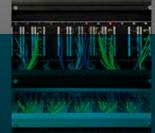

Specifications	MDC 100	MDC 200	MDC 300
Height units	43 U	43 U	43 U
Available space	42 U	39 U	33 U
Dimensions (HxWxD)	2200 x 800 x 800 mm	2200 x 800 x 1200 mm	2200 x 800 x 1200 mm
Doors	Closed (glas front and metal back)	Perforated	Closed (glas front and metal back)
Access control	EK333	EK333	EK333
UPS Capacity	-	up to 3 kVA	up to 3 kVA
Back-up time	-	13 / 28 min @ 100% / 50% load	13 / 28 min @ 100% / 50% load
Cooling capacity	-	-	3.6 kW
User interface	Touch screen, web browser	Web browser	Touch screen, web browser
Monitoring	Temperature, humidity, door status	Temperature, humidity, door status	Temperature, humidity, smoke, door status, leakage, vibration
Alarm	Sound/light alarm, email notification	Sound/light alarm, email/SMS notification	Sound/light alarm, email/SMS notification
Options	Cabling and cable management	Cabling and cable management, scalable backup batteries	Cabling and cable management, ventilation fans, fire extinction system, scalable backup batteries

#### Versions

The Datwyler Micro Data Centre is a tailor-made and customised solution to fulfil the customers' specific needs and requirements

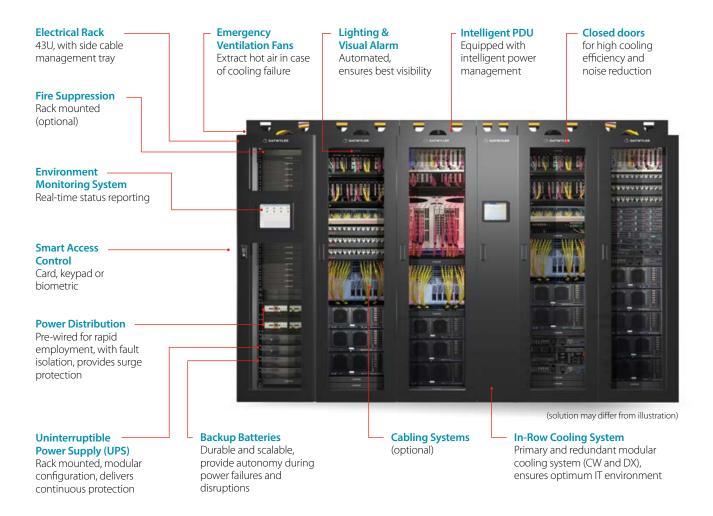

## MICRO AND MINI DATA CENTRE

### **DATWYLER MINI DATA CENTRE**

Datwyler's modular Mini Data Centre is a state-of-the-art, pre-assembled plug-and-play IT infrastructure solution. It consists of a 43U rack with integrated power distribution, uninterruptible power supply (UPS), fire suppression system (optional), air gap sealing and environment monitoring system, as well as additional IT equipment racks and an in-row cooling system. It can be deployed within a few hours. It provides multiple ways to configure power and cooling redundancy to meet the current demand while being ready for future technology migration at low cost and with less disruption.

Datwyler's modular Mini Data Centre is designed for applications such as edge computing, small data centre, building distributor (BD), floor distributor (FD) and "smart facilities" deploying IoT devices and running AI, AR, VR and automation.

#### Specifications

opeaneations	
IT load	up to 72 kW
UPS capacity	up to 80 kVA
IT racks	up to 8 (static load 1300 kg / rack)
Backup time	up to 15 min
Sensible cooling capacity	up to 75.3 kW (CW or DX)
Dimensions (W x D x H)	800 x 1200 x 2200 mm
Mounting	Direct on floor or on raised floor
Cable entry	Top / bottom access
Emergency ventilation	Top of the rack and front door

Remote management	Cooling system, UPS, access control, iPDU, environment setpoint and alarm notification
Remote monitoring	Cooling system, UPS, access control, iPDU, environmental monitoring system
User interface Alarm	Remote web interface Sound/light alarm, email notification

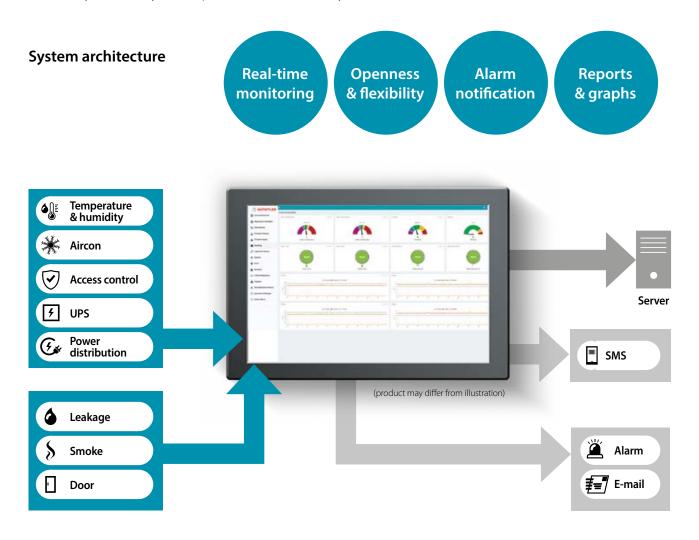

#### Versions

The Datwyler Mini Data Centre is a tailor-made and customised solution to fulfil the customers' specific needs and requirements

### **DIMS - DATWYLER INFRASTRUCTURE MONITORING SYSTEM**

The Datwyler Infrastructure Monitoring System (DIMS) provides a top level as well as a detailed overview of the status of IT infrastructure housed within a Micro and Mini Data Centre. The system is characterized by real time remote monitoring of environmental conditions, access and energy consumption of IT infrastructure devices and systems. In case of faults or emergencies the system is capable of alerting the user to take timely and necessary action to protect the mission critical IT systems.

**DIMS** features

#### . Multilingual Web GUI with integrated logic

- . Autosensing ports for the automatic detection of sensors
- . User access management
- . Integrated interfaces: Ethernet, USB, CAN, analog & digital
- . SNMP-compatible
- . Provides notifications and alerts such as e-mail, SMS and SNMP traps
- . Extensive range of sensors for environmental monitoring,
- security control and power monitoring
- . USB interface for video camera
- . SD card slot for optional SD card (max. 64 GB)
- . SIM card slot for optional LTE modem
- . Alarms for maintenance and critical events
- . Graphical representation of environmental data

### **RACK MONITORING SYSTEM**

DIMS 300	Article no.	Description	PU
	41847300ZY	DIMS 300 is a tried and tested monitoring system which can be used in all branches of industry for the continuous measurement, recording and reporting of performance-critical environmental factors in a rack. It combines the most advanced hardware and software. Robust metal housing in 19 inch format. Internal 230 volt power supply. 8 auto-sensing R112 ports for attaching sensors. Can be extended with additional sensor ports or digital inputs via CAN port. Alarm messages possible via bistable relays. Can be integrated into SNMP-compatible management software on request.	1 pc
		Further features:         1x CAN port for extensions or CAN sensors         12x bistable relay ports (dry contact)         2x 12V DC / 0.25A relays         2x bistable relays with status LEDs, max. 250V AC / 10A         1x 12V DC connection for backup battery         1x 2.0 HS mini USB slot for USB video camera or USB memory stick         1x internal temperature sensor for controlling excessive temperature         100 MBit Ethernet port         External earthing point         LEDs: power, relays, alarm, CAN         Front restart button         Network protocols: DHCP, HTTP, SSL, SNMP, SNMP Get, SMTP, SSL, FTP, Syslog, Radius, TLS         Functions: timer, ping, trigger, alarm filter, virtual sensors via SNMP Get         Types of alarm: FTP, Syslog, SMTP, SNMP Trap         Multilingual Web interface

# ANYWHERE IN THE WORLD: WE REALIZE YOUR PROJECT

WE SPEAK YOUR LANGUAGE – ALSO FROM A CULTURAL POINT OF VIEW You will find us wherever IT infrastructures are involved.

Not only are we fluent speakers of all the major languages, but we're also well versed in the special cultural and application-specific features of each particular country. We are familiar with the rules and requirements and know what is important. This saves our international customers time and money. For they know that Datwyler's development, production and quality control, geared to the specific criteria of the domestic market, give them significant competitive advantages.

And they are sure to feel "at home" if they are then given advice and support in their native language into the bargain.
