

MCO IP69k – protective housing for DNT outdoor applications

MCO IP69k – protective housing for DNT* outdoor applications

Digital networking | The demand for outdoor cabling solutions is growing unabated. This is due to modern network and IP interface technologies, which are essential for digitization. These will enable

the networking and deployment of surveillance cameras, sensors and digital traffic signs, as well as wireless access points.

METZ CONNECT Outdoor | Our MCO IP69k protective enclosures provide reliable protection for your permanent outdoor connections. They are not only completely dustproof and waterproof, but also resistant to ozone, UV radiation and salt water. Furthermore, they withstand high temperatures,

strong vibrations and high-pressure jet cleaning, thus providing reliable protection against external interference. The flexible and easy-to-install solutions have been specially designed to accommodate and protect field-assembled cables, pre-assembled patch cables and fiber optic (FO) connections.

Flexible & reliable | Our universally applicable protective housings for outdoor applications are available in three different versions, and cover all conceivable applications in practice. The three variants of the protective housings have been specially designed for free installation, as well as for wall, DIN rail, quick and pole mounting. In addition, we also offer a solution for wall or housing feed-through.

Thanks to the adapter plates included in the delivery contents, countless combinations are possible with various modules, plug-in connectors, and cable connectors, regardless of whether it is a matter of accommodating and protecting field-assembled cables or pre-assembled patch cables and fiber optic (FO) connections.

*DNT = Data Network Technology

Structure

DUST AND WATERPROOF
RESISTANT TO OZONE, UV RADI-
ATION AND SALT WATER

IP69K, IP67
AND IP66

UNIVERSALLY AND
FLEXIBLY APPLICABLE

HIGH PRESSURE JET,
TEMPERATURE AND
VIBRATION RESISTANT

- MC module
- Keystone
- Fiber optic (FO)

Variant

MCO IP69k – set for free laying

Part Number: 14040000-E

- > universally and flexibly applicable
- > completely dust and waterproof
- > resistant to ozone, UV radiation and salt water
- > resistant to high-pressure jet cleaning, high temperatures, and strong vibrations
- > tested according to IP69k, IP67 and IP66
- > M32 anodized aluminum tubes and flange
- > incl. M32 cable glands (PA) with sealing inserts, O-rings, and adapter plates for MC module, keystone and fiber optic (FO) components, for clean mounting inside the flange
- > suitable for cable sheath diameters from 4.5 to 15 mm

MCO IP69k – set with mounting bracket

Part Number: 14040010-E

- > designed for wall, top-hat rail, quick and pole mounting
- > incl. mounting bracket and mounting plate for quick and tool-free fixation of the flange
- > universally and flexibly applicable
- > completely dust and waterproof
- > resistant to ozone, UV radiation, and salt water
- > resistant to high-pressure jet cleaning, high temperatures, and strong vibrations
- > tested according to IP69k, IP67 and IP66
- > M32 anodized aluminum tubes and flange
- > incl. M32 cable glands (PA) with sealing inserts, O-rings, and adapter plates for MC module, keystone and fiber optic (FO) components, for clean mounting inside the flange
- > suitable for cable sheath diameters from 4.5 to 15 mm
- > Top-hat rail adapter not included in the delivery contents, P/N: 1308990111-I

MCO IP69k – set wall and housing bushing

Part Number: 14040100-E

- > incl. M40 locknut (PA) for wall and housing mounting
- > universally and flexibly applicable
- > completely dust and waterproof
- > resistant to ozone, UV radiation, and salt water
- > resistant to high-pressure jet cleaning, high temperatures, and strong vibrations
- > tested according to IP69k, IP67, and IP66
- > M32 anodized aluminum tube and flange
- > incl. M32 cable gland (PA) with sealing inserts, O-rings, and adapter plates for MC module, keystone and fiber optic (FO) components, for clean mounting inside the flange
- > suitable for cable sheath diameters from 4.5 to 15 mm

Accessories

MCO IP69k – protective cover for flange

Part Number: 14040Z02-E

- > M32 anodized aluminum protective cover
- > suitable for P/N: 14040000-E, 14040010-E, 14040100-E

Application examples – set with mounting bracket

Quick assembly

Wall mounting

Carrier rail mounting

Mast mounting

Application example – for wall and housing bushing

Wall mounting

Application examples

Moving the active components

e.g. surveillance camera or wireless access point

Cable extension

e.g. cable too short

Repair

e. g. defective cable

Reduction of the cable diameter

e. g. too rigid, fixed cable

Notes on the protection of patch cables

The MCO IP69k protective housing for outdoor applications can be used to protect numerous interfaces as well as patch cable connections. Since RJ45 plugs cannot be passed

through the seals included in the scope of delivery due to their dimensions, a remedy must be found.

To ensure IP69k protection, it is recommended to disconnect one side of the patch cable.

To be able to maintain the IP69k protection, ideally one plug side of the patch cable should be disconnected and replaced by a field-terminable plug, such as our C6_A RJ45 field plug pro

(130E405032-E), so that the installation can then be carried out according to the installation instructions.

The use of the split seal reduces the degree of protection to IP66 from IP69k.

Alternatively, we offer a split seal for patch cables (895154-I), which can be widened accordingly to allow the RJ45 connector to pass through. Consequently, patch cable connections can be protected without having to disconnect the connected RJ45

plug first. However, it is important to note that the use of the split seal for patch cables (895154-I) reduces the protection class from IP69k to IP66, which is why we only recommend this alternative option to a limited extent.

Furthermore, it should be taken into account that only cables suitable for outdoor installation may be used in outdoor areas, such as our patch cable RJ45 6kV Flex500 Outdoor AWG 24 (13084F3000-E).
