

PATCHBOX Patchcatch

PATCHBOX Simplify IT

PATCHBOX Patchcatch

DESCRIPTION

Our innovative cable organizer with zero rack units - the Patchcatch 0RU - can simply be mounted under the mounting brackets of switches and patch panels. Compared to conventional horizontal cable management it does not take any additional space in a network cabinet. All patch cords - Cat6 and fibre optics - are guided to the side of the RU and are patched to keep the cabinet nice and tidy. No more cable spaghetti! The Patchcatch works with conventional patch cords as good as with the PATCHBOX. A great alternative to conventional cable management. Every PATCHBOX System as well as PATCHBOX Frame includes 6 Patchcatches.

TECHNICAL SPECIFICATIONS

PLASTIC PARTS

Polyoxymethylene POM

OPERATING TEMPERATURE RANGE

-50°C – 150°C

AMBIENT HUMIDITY NON-CONDENSING

10% - 95%

WEIGHT
